Technical Skills	C++, Python, Javascript , ReactJs , JQuery , Redux , HTML , CSS
Soft Skills	Teamwork, Problem solving, Communication

EXPERIENCE

Front-end Developer   Jun 2022 - July 2022

Alecado System   *Pune , Maharastra*

- Made the website for the company with my 2 collegeues using reactjs and javascript.
- It is a NFT website whose frontend is made in ReactJs. The website is also hosted (Try it here)
- I was working under the manager itself and he was so helpful to me during the project.
- Learn many important stuff related to ReactJs and Git commands.
- Attended meetings and also get to know how work is done in companies.

PROJECTS

To-Do Website.   A simple To-Do App which I made using HTML , CSS , ReactJS and Javascript. Added the add and delete the todo functionality. I also used the localStorage of the browser to store the todo so that it won't disappear on refreshing the page. A simple and attractive UI is given. It is fully responsive website. Simple and eye-strainless background is also given. It also show the count of todo the used has added. (Try it here)

NoInstaClone.   Similar website(but I was not cloning) to Instagram. It is Fully responsive. Sticky navbar with beautiful design. Images always changes on each refresh. You can like the post by double tapping over image just like the official instagram. ReactJs , HTML and CSS is used. Footer is also provided with suitable links. (Try it here)

Aimore-Food-Website.   In this website, I've used ReactJs , HTML , CSS , and Redux . You can add and remove item from cart. Not added the cart page though as I made this within one night, just watch the cart icon as the numbers will reduce and increase as you add or remove item. Not responsive though as I made this in one night. Effects added on the food card and buttons. Routing is done also using react-router-dom library. (Try it here)

Google keep Clone.   It is a clone of Google Keep App. I've used Reactjs , HTML and CSS to make this. I've tried to make it as much similar as I can to Google keep. You can add and delete the notes. (Try it here)

Simon Game.   It is a simple game made using pure JavaScript , called it Simon Game . It's a buzzer game which we have to press in sequence. If you break the sequence it will give u a red buzzer. This game can be used to make your memory power stronger and also helps in building your concentration stronger .(Only for PC) (Try it here)

ACHIEVEMENTS

- 5-star on HackerRank with 1000+ points.

- 350+ points on GFG (handle : abhisekkumarsingh021).
